

ARDENT ADVISORY

Website Copy Deck — All Pages

Anonymous Phase | July 2026 | Conversion Copywriting Framework

BRAND VOICE	Professional. Technical. Direct. Confident without arrogance. Reads like someone who has been inside the building, not outside it pitching.
TARGET	Owners and operators of commercial, municipal, and sports facilities. Procurement officers. CFOs. COOs. City managers. Franchise ownership groups.
GOAL	Establish qualifications. Generate inquiries. Convert visitors to Contact form submissions or phone calls.
EMOTIONAL TRIGGERS	Authority (decades of experience). Urgency (the decisions you are making right now determine facility performance for decades). Scarcity (genuine independence is rare). Trust (no conflicts of interest).
ANONYMOUS CONSTRAINT	No individual named. No employer names. No specific stats that function as a fingerprint. Firm capability positioning only.

Copy block format: Each element shows its heading level, label, character count, and implementation notes in the header row. The actual copy is in the body row below. Every word in this document is production-ready — paste directly into Figma Make or CMS.

PAGE 1: HOME

Purpose: Establish credibility in under 5 seconds. Route to the right practice area. Convert to contact. This page does the work of a 30-second elevator pitch — every word earns its place.

Hero Section

H1	Hero Headline	42 chars	6 words. Authority trigger: 'Independent' is the differentiator. 'Facility Owners' is the audience. Period at end = declarative confidence.
Independent Advisory for Facility Owners.			
Body Lg	Hero Subhead	118 chars	15 words in first sentence. Scarcity trigger: 'No conflicts' — what competitors cannot say. Three negatives that are actually the strongest positive.
Owner-side advisory across the full lifecycle of your facility. No design contract. No management agreement. No conflicts.			

CTA	Primary CTA	20 chars	Routes to first service page (asset-management). Action-oriented. Not 'Learn More' — too passive.
Explore Our Services			
CTA	Secondary CTA	20 chars	Routes to Contact. 'Start a Conversation' is less transactional than 'Contact Us' — signals peer relationship, not vendor submission.
Start a Conversation			

Stat Bar

Immediately below hero, flush. Four generalized stats on navy background. Authority trigger: scale without fingerprint.

STAT 1	STAT 2	STAT 3	STAT 4
DECADES of Facility Leadership	DOZENS of Major Venue Projects	BILLIONS in Construction Value	HUNDREDS of Venues Supported

Stat values are H2 visually but rendered as <dd> within a <dl> semantically. Labels are <dt>. No specific numbers during anonymous phase.

Practice Area Overview — 3 Cards

H2	Section Heading	10 chars	Simple. Direct. Not 'Our Services' — too corporate. Not 'How We Help' — too soft.
What We Do			

Card 1: Asset & Property Management

H4	Card Title	36 chars	Matches nav and service page title exactly. Consistency builds trust.
Asset & Property Management Advisory			
Body Sm	Card Description	170 chars	Power words: 'institutional-grade' signals credibility to PE and investor audience. 'Owner's perspective' is the positioning statement in miniature.
Institutional-grade advisory for commercial, municipal, and mixed-use assets. From operational benchmarking to capital planning — the owner's perspective on every decision.			
Link	Card CTA	24 chars	Specific route. Not generic 'Learn More.'
Explore Asset Management			

Card 2: Venue & Facility Advisory

H4	Card Title	25 chars	
	Venue & Facility Advisory		
Body Sm	Card Description	168 chars	Urgency trigger: '30 years' — the consequence of getting it wrong. Sentence fragments at opening create pace and authority.
	Programming. Design review. Pre-opening. Operations. The decisions made before the first shovel hits the ground determine how your venue performs for the next 30 years.		
Link	Card CTA	22 chars	
	Explore Venue Advisory		

Card 3: Facility Assessment

H4	Card Title	29 chars	
	Facility Condition Assessment		
Body Sm	Card Description	155 chars	Authority trigger: 'decades inside these facilities' — experience claim without specifics. 'Honest' and 'actually' are power words for this audience.
	An honest picture of what your building actually needs — not what minimizes the findings. Independent assessment backed by decades inside these facilities.		
Link	Card CTA	27 chars	
	Explore Facility Assessment		

Independence Statement

Callout	Independence Callout	381 chars total	Scarcity trigger: this positioning is rare and the audience knows it. 'Actually' appears twice — intentional. It signals the contrast with competitors who hedge. Final sentence is the anchor line — short, declarative, memorable.
	No design contract. No management agreement. No operator relationship to protect. Every engagement is structured entirely around the owner's interest. The analysis reflects what is actually there. The recommendations reflect what you actually need. The advice does not change based on who else is in the room. That independence is not a marketing position. It is how we work.		

Who We Serve

H2	Section Heading	12 chars	Direct. Audience self-identifies immediately by scanning the three columns.
	Who We Serve		

ASSET OWNERS & INVESTORS	PUBLIC SECTOR	SPORTS & ENTERTAINMENT
Commercial real estate ownership groups Institutional investors and family offices Private equity with asset-level operations REIT and portfolio owners Mixed-use development	Municipal governments and public agencies Convention and visitors bureaus Public assembly authorities University systems and higher education Stadium and arena authorities	Professional sports franchise ownership Arena and stadium operators Convention center owners Performing arts authorities Minor and independent league facilities

CTA Banner

H2	Banner Headline	34 chars	Conversational. 'Your facility' makes it personal. Question format invites response.
	Ready to talk about your facility?		

Body	Banner Subtext	108 chars	Trust trigger: 'No pitch' disarms the sales expectation. 'People who understand these buildings' is the authority claim in conversational language.
	No pitch. No proposal until you are ready. Just a conversation between people who understand these buildings.		

CTA	Banner Button	20 chars	Same CTA as hero secondary. Consistency. Routes to Contact.
	Start a Conversation		

PAGE 2: ABOUT

Purpose: Establish firm credibility without identifying the individual. The content must be compelling enough to convince a procurement officer to shortlist the firm — without naming a single person, employer, or traceable statistic.

Hero / Page Header

H1	Page Heading	21 chars	Not 'About Us' (implies team you cannot show). Not 'Our Story' (implies narrative you cannot tell). Simply the firm name.
About Ardent Advisory			
Body Lg	Page Subhead	82 chars	Three verbs — build, own, operate — cover the full client lifecycle in one sentence.
Independent advisory for the people who build, own, and operate complex facilities.			

Section 1: Why We Exist

H2	Section Heading	12 chars	
Why We Exist			
Body	Section Body	630 chars	Scarcity trigger in para 2: 'rare.' Authority trigger in final sentence: 'inside these buildings.' The short opening sentence hooks — then the longer sentences deliver the argument.
Facility owners deserve an advisor who works for them. Not for the design team. Not for the management company. Not for the operator who wants the next contract. That kind of independence is rare in this industry. Most advisory comes with an agenda attached. Ardent Advisory was founded to fill that gap: independent, owner-side advisory for the people who build, own, and operate complex facilities — sports venues, convention centers, arenas, performing arts centers, commercial properties, and public assembly facilities. We bring the operational perspective that pure design firms, engineering consultants, and management companies cannot provide. Because we have spent our careers inside these buildings. Not outside them looking in.			

Section 2: What We Bring

H2	Section Heading	13 chars	
What We Bring			
Body	Section Body	124 chars	Intro paragraph before bullet list. 'Decades' not a specific number.
Ardent Advisory brings decades of hands-on experience across the full lifecycle of complex facilities. That experience spans:			
Bullets	Experience List	~680 chars	Six bullets. Each opens with facility type in bold (implementation note). League names (NFL, MLB, NBA, NHL) are not traceable to an individual — they describe the market segment. 'Multiple countries' not '27 countries.'
Major sports stadiums, arenas, and entertainment venues — including NFL, MLB, NBA, and NHL facilities Convention centers and public assembly facilities — programming, operations, and asset management Class A commercial office properties — institutional property management and capital planning Multi-site venue portfolios — operational standardization, best practices, and performance benchmarking across large facility networks National and international scope — facility advisory across multiple countries and continents National Special Security Events — operational leadership on events requiring coordination with federal, state, and local law enforcement			
Body	Closing Paragraph	249 chars	Three-sentence close. Final sentence is the positioning anchor. Short. Declarative. Memorable.
That range of experience — both the breadth of facility types and the depth within each — is what allows Ardent Advisory to see things other advisors miss. A design firm sees the drawing. A management company sees the contract. We see the building.			

Section 3: Our Approach

H2	Section Heading	12 chars	
Our Approach			
Body	Section Body	590 chars	Authority + trust triggers throughout. The three 'not what' constructions in para 3 create rhythm and position against competitors simultaneously. Final sentence is the value proposition.
Every engagement starts from the same place: what does the owner need to know to make a sound decision? Not what the architect wants to build. Not what the contractor wants to bid. Not what the operator wants to manage. What the owner needs. Our Facility Condition Assessments report what is actually there — not what minimizes the findings. Our programming advisory reflects what the market will support — not what the city can afford to build. Our operations advisory tells owners what their building actually requires — not what fits the current staffing plan.			

We built this practice on the belief that honest, experienced, independent advisory is the most valuable thing a facility owner can buy.

Section 4: Independence Statement

Same callout as Home page. Repeated intentionally — reinforcement, not redundancy. The independence position is the single most important brand message.

Social Proof Framework

During the anonymous phase, traditional testimonials with client names and photos are not available. The following framework provides social proof through structural credibility rather than attributed endorsements.

H2	Section Heading	33 chars	Power word: 'Proven.' Authority trigger: 'Every Facility Type' — breadth claim.
Proven Across Every Facility Type			

PROOF ELEMENT	COPY
Stat — Experience Depth	Decades of leadership across the most complex facility environments in North America — and internationally.
Stat — Project Scale	Advisory on dozens of major venue development and renovation projects with a combined construction value in the billions.
Stat — Operational Breadth	Best practices support to hundreds of venues spanning stadiums, arenas, convention centers, performing arts facilities, and commercial properties.
Stat — Security Clearance	Operational leadership on National Special Security Events requiring coordination with federal law enforcement and emergency management agencies.
Post-Transition Placeholder	[POST-TRANSITION: Client testimonials with attributed quotes added here. Three testimonials minimum. Format: quote, name, title, organization, project type.]

POST-TRANSITION NOTE: When the principal is publicly identified, this section adds three client testimonials with full attribution. Framework: 2-3 sentence quote focused on outcome, client name, title, organization, and project type. Testimonials should be solicited from clients across all three practice areas.

PAGE 3: ASSET & PROPERTY MANAGEMENT ADVISORY

Hero / Page Header

H1	Page Heading	36 chars	
Asset & Property Management Advisory			
Body Lg	Page Subhead	134 chars	Power word: 'institutional-grade.' Authority: 'your assets require' — not optional, necessary.
Institutional-grade advisory for owners and investors managing complex property portfolios. The operational insight your assets require.			

Feature Section 1: Commercial RE

H2	Block Heading	39 chars	
Commercial Real Estate Asset Management			
Body	Block Body	~450 chars	Two paragraphs. First defines scope. Second delivers the differentiator.
Owner-side advisory for commercial real estate assets — Class A office, mixed-use, and institutional properties. Ardent Advisory brings institutional property management discipline to owners evaluating operational performance, capital planning, and asset value strategy. Our experience managing large-scale commercial portfolios gives us the operational lens that pure financial advisors lack — and the financial fluency that pure property managers often miss.			
Bullets	Service List	~320 chars	Six bullets. Each starts with a noun, not a verb — matches how procurement officers scan RFP responses.
Operating budget development and administration Third-party vendor contract development and oversight Tenant improvement project management Operating expense reduction and efficiency analysis Post-casualty restoration management Business strategy planning for ownership groups and investors			

Feature Section 2: Capital & Investment

H2	Block Heading	29 chars	
----	---------------	----------	--

Capital & Investment Advisory

Body	Block Body	~400 chars	'Significant private equity transactions' — generalized, not traceable. 'Both the numbers and the building' — the differentiator line.
------	------------	------------	--

Advisory support for ownership groups and investors navigating asset acquisition, repositioning, disposition, or recapitalization.

Our experience contributing to significant private equity transactions in the venue management sector provides direct insight into what institutional investors require from asset-level due diligence and operational reporting. We understand both the numbers and the building.

Bullets	Service List	~280 chars	
---------	--------------	------------	--

Operational due diligence for asset acquisition Capital needs identification and investment sequencing KPI and metrics-based performance reporting for ownership and C-suite Management contract evaluation and restructuring Profitability enhancement strategy

Feature Section 3: Operational Excellence

H2	Block Heading	39 chars	
----	---------------	----------	--

Operational Excellence & Best Practices

Body	Block Body	~470 chars	'Hundreds of best practices' not '800+.' 'Millions in savings' not '\$15M.' Generalized but still powerful.
------	------------	------------	---

Systematic evaluation and improvement of operational performance across complex, multi-site asset portfolios.

Ardent Advisory has developed and deployed proven operational frameworks across large facility networks — covering hundreds of best practices documents, multi-site standardization programs, and national vendor contract strategies that have delivered millions in documented annual savings. That methodology translates directly to any complex asset environment.

Bullets	Service List	~350 chars	
---------	--------------	------------	--

Multi-site operational consistency and standardization Financial reporting and contract management systems Utilities and energy management programs National vendor contract pricing and master service agreements Technology platform assessment and implementation advisory Staff development and training program design

H2	Page CTA Heading	38 chars	'Deserve' is a power word for this audience — it frames independence as a right, not a luxury.
----	------------------	----------	--

Your assets deserve independent advice.

CTA	Page CTA Button	22 chars	'Portfolio' signals you speak the investor language. More specific than 'Contact Us.'
-----	-----------------	----------	---

Discuss Your Portfolio

PAGE 4: VENUE & FACILITY ADVISORY

Hero / Page Header

H1	Page Heading	25 chars	
Venue & Facility Advisory			
Body Lg	Page Subhead	138 chars	<i>Urgency trigger: '30 years.' Authority: 'We make sure.' Direct, confident, no hedge.</i>
The decisions made before the first shovel determine how your venue performs for the next 30 years. We make sure those decisions are right.			

Feature Section 1: Programming

H2	Block Heading	39 chars	
Venue Programming & Pre-Design Advisory			
Body	Block Body	~500 chars	<i>Urgency in every sentence. 'Most consequential moment' is deliberate — it frames the service as essential, not optional.</i>
Owner-side advisory at the most consequential moment in a venue project — before the architects are selected and while the fundamental decisions about size, scope, program, and investment are still being formed. The programming decisions made in the first six months determine operational performance for the next three decades. Ardent Advisory has been inside this moment across dozens of major venue projects. We know what happens when programming is done well — and what it costs when it is not.			
Bullets	Service List	~260 chars	
Facility programming and space planning Market and demand analysis Design brief development for owner RFP preparation for design services Architect and consultant selection advisory FF&E programming and procurement advisory			

Feature Section 2: Design Review

H2	Block Heading	38 chars	
Design Review & Owner's Representation			

Body	Block Body	~430 chars	'What wins awards' vs 'what works' — the tension every facility owner feels. This copy names it.
Independent review of design documents at each phase — schematic, design development, and construction documents — from the owner's operational perspective. We identify design decisions that serve the architect's vision but create operational inefficiencies, maintenance challenges, or lifecycle cost overruns for the owner. Your design team builds what wins awards. We make sure it also works on day one and for the next 30 years.			

Bullets	Service List	~250 chars	
Operational review of design at each phase Guest experience and circulation analysis Maintenance access and long-term maintainability review Technology and systems integration advisory Owner representation in design team meetings			

Feature Section 3: Pre-Opening & Operations

H2	Block Heading	35 chars	
Pre-Opening & Operational Readiness			

Body	Block Body	~400 chars	'Actually works on opening day' — authority trigger from direct experience. Positions against theoretical competitors.
The period between substantial completion and opening day is where venue projects succeed or fail operationally. Ardent Advisory has managed pre-opening programs across dozens of venues — from NFL stadiums to international convention centers. The operational knowledge embedded in every building we have advised on reflects what actually works on opening day. Not what looks good in a planning document.			

Bullets	Service List	~250 chars	
Organizational structure development Operations manual authorship and implementation Safety, security, and emergency management program development Event management protocol development Vendor and contractor transition management			

H2	Page CTA Heading	47 chars	Urgency trigger: '30-year decision.' Imperative: 'Get it right.' Short. Direct.
Your venue is a 30-year decision. Get it right.			

CTA	Page CTA Button	20 chars	
Discuss Your Project			

PAGE 5: FACILITY CONDITION ASSESSMENT

Hero / Page Header

H1	Page Heading	48 chars	
Facility Condition Assessment & Capital Planning			
Body Lg	Page Subhead	134 chars	Trust trigger: 'honest, independent.' Scarcity: positions against operator-conflicted assessments. 'Actually needs' = the Ardent brand voice.
An honest, independent assessment of what your building actually needs. Not what minimizes the findings. Not what protects the operator.			

Feature Section 1: FCA

H2	Block Heading	30 chars	
Facility Condition Assessments			
Body	Block Body	~750 chars	Three paragraphs: what it is, what you get, why we are different. The third paragraph is the conversion paragraph — it differentiates.
A comprehensive, systematic evaluation of your facility's physical condition across all building systems — structural, mechanical, electrical, plumbing, life safety, technology, and building envelope. The FCA establishes an accurate, documented baseline of your facility's current state, identifies deficiencies, and prioritizes remediation. Delivered as a clear, actionable report you can take directly into capital planning, bond financing, lease negotiations, or management contract discussions. What makes our assessments different: we bring direct operational knowledge that pure engineering or architectural firms cannot replicate. Decades of experience inside these buildings means deficiencies are identified not just as physical conditions — but as operational risks, liability exposures, and capital planning priorities.			
Bullets	Deliverables	~310 chars	Labeled 'Deliverables' not 'Services' — tells the buyer exactly what they get.
System-by-system assessment across all major building components Photographic documentation of conditions and deficiencies Prioritized remediation recommendations with cost estimates Executive summary for board and stakeholder presentation Digital deliverable formatted for capital planning integration			

Feature Section 2: LTCNA

H2	Block Heading	34 chars	
Long-Term Capital Needs Assessment			
Body	Block Body	~530 chars	<i>Final sentence is the anchor line — converts the FCA buyer into an LTCNA buyer.</i>
A forward-looking analysis of your facility's capital investment requirements over a 10, 15, or 20-year horizon. Built on the FCA baseline, the LTCNA models the cost and timing of system replacements, major repairs, and capital upgrades across the full facility lifecycle. It gives you the financial planning tool you need to budget responsibly, avoid deferred maintenance crises, and present credible capital needs to governing boards, public finance bodies, and bond rating agencies. The LTCNA is the document that turns an FCA from a snapshot into a strategy.			

Feature Section 3: Strategic Capital Planning

H2	Block Heading	34 chars	
Strategic Capital Planning Advisory			
Body	Block Body	~370 chars	<i>'Beyond the assessment' signals upsell naturally — FCA buyers see the next step without being pitched.</i>
Beyond the assessment, Ardent Advisory works with you to translate findings into executable capital investment strategy. We prioritize investments by operational impact and risk, structure capital programs for public financing or bond issuance, and develop the owner's position for management contract or lease negotiations where capital responsibilities are a central issue.			
H2	Page CTA Heading	38 chars	<i>'Actually' is the Ardent brand word. It appears throughout the site. It signals contrast with competitors who soften findings.</i>
Know what your building actually needs.			
CTA	Page CTA Button	21 chars	<i>Most action-specific CTA on the site. 'Request' not 'Learn about' — conversion-oriented.</i>
Request an Assessment			

PAGE 6: CONTACT

Page Header

H1	Page Heading	20 chars	Matches hero secondary CTA and banner CTA. Consistent language throughout. Not 'Contact Us' — too transactional.
Start a Conversation			

Body Lg	Page Subhead	74 chars	Trust trigger: 'honestly.' Reciprocity: you share, we respond. Low-pressure framing.
Tell us about your facility. We will tell you honestly whether we can help.			

Form Labels

FIELD	LABEL	REQUIRED
Name	Your Name	Yes
Organization	Organization	Yes
Email	Email Address	Yes
Phone	Phone Number	No
Service Interest	What can we help with?	Yes
Message	Tell us about your facility and what you are facing.	Yes

DROPDOWN OPTIONS	Asset & Property Management Advisory Venue & Facility Advisory Facility Condition Assessment Other
------------------	--

Body Sm	Form Note (below submit)	103 chars	Trust trigger: 'real person.' Anti-automation positioning — municipal clients are tired of being funneled into marketing sequences.
We respond within one business day. No automated follow-up sequences. A real person reads every message.			

Success State

H3	Success Heading	54 chars	
Thank you. We will be in touch within one business day.			

Body	Success Body	175 chars	Repeats 'real person' from form note. Offers phone for urgency. Reinforces anti-automation positioning.
Your message has been received. A real person will review it and respond directly — no automated sequences, no sales funnel. If your matter is urgent, please call us at [phone].

FAQ SECTION — 8 QUESTIONS

Implementation: accordion component on the About or Contact page, or as a standalone section on the Home page below the CTA banner. Each question is an H3 trigger; answer reveals on click. Schema.org FAQPage markup for SEO.

Q1: What makes Ardent Advisory different from other facility consultants?

H3 / Body	FAQ 1	288 chars	Scarcity + trust: 'ours does not' is the anchor.
	Independence. We carry no design contract, no management agreement, and no operator relationship that shapes our analysis. When we assess your facility or advise on a project, the only interest we serve is yours. Most advisory in this sector comes with an agenda attached — ours does not.		

Q2: What types of facilities do you work with?

H3 / Body	FAQ 2	388 chars	
	Sports stadiums and arenas, convention centers, performing arts venues, Class A commercial office properties, mixed-use developments, university and higher education facilities, and public assembly venues of all types. Our methodology applies across every complex facility type — because the operational challenges are fundamentally similar regardless of what happens inside the building.		

Q3: What is a Facility Condition Assessment?

H3 / Body	FAQ 3	551 chars	Longest answer — this is the most searched term. SEO value.
	An FCA is a comprehensive, system-by-system evaluation of your facility's physical condition — structural, mechanical, electrical, plumbing, life safety, technology, and building envelope. The result is an accurate baseline document that identifies deficiencies, prioritizes remediation, and gives you the data you need for capital planning, bond financing, lease negotiations, or management contract discussions. Our FCAs go further than most because we bring operational experience inside these buildings, not just engineering analysis from outside.		

Q4: How is a Long-Term Capital Needs Assessment different from an FCA?

H3 / Body	FAQ 4	308 chars	
	The FCA tells you what your building needs today. The LTCNA tells you what it will need over the next 10, 15, or 20 years — modeling the cost and timing of system replacements, major repairs, and capital upgrades across the full facility lifecycle. Together, they give you both the snapshot and the strategy.		

Q5: Do you work with public agencies and municipal governments?

H3 / Body	FAQ 5	309 chars	
Yes. Municipal governments, public assembly authorities, convention and visitors bureaus, university systems, and stadium and arena authorities are core clients. We understand public procurement, public accountability, and the specific requirements of advising on publicly funded or publicly owned facilities.			

Q6: At what stage of a project should we engage Ardent Advisory?

H3 / Body	FAQ 6	530 chars	Urgency trigger: '30 years' + 'single highest-value decision.'
As early as possible — ideally before architects or design teams are selected. The programming and pre-design decisions made in the first six months of a project determine facility performance for the next 30 years. Engaging an independent owner's advisor before the design team is in the room is the single highest-value decision a facility owner can make. That said, we also work with owners on existing facilities — operational reviews, FCAs, capital planning, and management contract advisory are equally core to our practice.			

Q7: Do you provide ongoing advisory, or only project-based engagements?

H3 / Body	FAQ 7	333 chars	
Both. We work on a project basis for specific engagements like FCAs, programming, and pre-opening advisory. We also provide ongoing operational advisory and asset management support through retainer arrangements — particularly for owners managing large or complex facility portfolios who benefit from consistent, independent counsel.			

Q8: How do I get started?

H3 / Body	FAQ 8	280 chars	Mirrors CTA banner copy. Consistency. Low-pressure close.
Contact us through the form on this site or call us directly. We keep introductory conversations simple — tell us about your facility, what you are facing, and what you need to know. We will tell you honestly whether we can help and how. No pitch. No proposal until you are ready.
